### News from the Practising Professors

Another busy week in practising professors this week. The year 6 children have been taking their mock SATs tests and showing how much progress they have made since the last tests they did. They are all getting in the mood for SATs now and their concentration is amazing. Keep up the hard work year 6 – we are nearly there!

We had a great visit to the Methodist church in Pateley Bridge on Wednesday, where the children really enjoyed learning the Easter story. It was a fantastic trip and the children's behaviour was impeccable. They listened so well, and their manners were fabulous. They were all CHAMPS!

On Thursday the children enjoyed a morning of French. They learnt the names for the animals and really impressed me with their French accents. We also learnt about French culture and a carnival they have in France.

### News from Working Wolves

It has been a fun-filled week so far in Working Wolves! This week, we have been continuing our research about the Stone age where we have been using the safe-searching sites to answer our own questions about elements of the Stoneage such as :

What is Skara Brae? How did the Stone age people write?

In English we have been writing our persuasive letters to the Harrogate Advertiser to convince them that we visited the Stone age and can prove it with pieces of evidence!

We have loved continuing our forest school journey this week too (We all would like to say a big thank you to Mrs Milner for making it so enjoyable for us) We had the opportunity to make bread— but first we had to make the fire to cook the bread on! To do this we got some sticks, broke up cotton wool and put this between the sticks and then used flint to create the fire. It was an amazing day!

### News from Talented Trolls

In P.E. class 1 Have been learning to play tennis. This involves hand eye co-ordination and learning the rules. They have all really enjoyed tennis and there is a lot of talent, the next Wimbledon winner could be here!

We have continued learning about stone age and had a stone age Dragons Den to pitch out stone age tools. Would you like to own a very heavy stone hammer which is brilliant for crushing rocks? We also iced some cakes to look like cave paintings, I think the best part was eating our wonderful creations!

We have been serving ourselves at lunch and sitting at new places. We really like it as we feel more independent.

We would still like some boxes, tubes and other bits for junk modelling, please bring in and either give to any member of the class one staff or leave at the office. Thank you.
