### News from the Practising Professors

What a busy week we have had in Practising Professors.

The year 6 children have done brilliantly this week taking their SATs mock tests. This is the first time they have seen real SATs papers and they have coped really well. They have worked in test conditions and done more than one on some days. Well done year 6.

We have also enjoyed forest school this week going up to the woods and making dens. The children really had to use their problem solving skills this week and the reward was some lovely hot chocolate. In art this week we enjoyed sketching polar animals. The children showed great perseverance when drawing this weeks and some people had over 3 goes at drawing one animal. They really impressed me how they wanted to improve their drawings.

### News from Working Wolves

It has been a busy and enjoyable week in Working Wolves.

We have noticed how much care the children are taking with their handwriting. Many of them are on a mission to gain a coveted pen license! They have also been working hard on spellings this week and have been looking at adding the prefixes -un and -dis.

This morning we enjoyed our assembly and workshop with Power Down Pete. The children were very good this afternoon at spotting ways to save energy. Harry even noticed that Pete himself had forgotten to turn off the interactive whiteboard after he had used it!

Our reading corner in Class 2 is starting to take shape and we are very thankful to the Bamfords who donated the fabulous bookshelf to us.

Thank you so much to the parents who have signed up to listen to readers in the afternoons and to help run the library at the end of the day. We still need volunteers for Wednesday and Friday afternoons. Please sign up if you can!

### News from Talented Trolls

This week we have been very busy settling in to our new routines.

We have been learning about Captain Scott's journey to the South Pole.

If you need more information just ask us. Mrs Malley also wanted to find out why penguins feet didn't freeze as the temperature drops to minus 40.

If you want to know the answer ask Emily!

We are looking after an egg this week, because we have been learning about Emperor penguins. Did you know that the male penguin looks after the egg for two months? We will only do a week!

We had a lovely assembly today with Power Down Pete. The children listened really well.
